Tall Size									
Cintas	Van Heusen								
4362760	4362660	16½	42						

Shirts are fitted by neck size and sleeve length. Sleeve length is measured from the middle of the back, just below the neck, to the wrist on an outstretched and slightly bent arm.

Big sizes are wider through the chest and body.

Tall sizes have additional length or longer tails.

Cintas—65% polyester–35% cotton

Van Heusen—60% cotton–40% polyester

Notes:

1. Remember we do not carry a dress in size 18M and may never.
2. This chart should also help those who want to understand how their garment tops and bottoms translate into standard clothing sizes.
3. ASTM used to be a U.S. standards organization but since 2001 has become a global standard. Beehive Clothing adheres to these standards.

# Garment Fabrics

The garment fabric is a major factor in your choice. Garments are available in many fabrics to meet varied needs and preferences. Some fabrics are used only in women's garments, and some are used only in men's garments.

## DriSilque™

DriSilque (pronounced "dry silk") is a 100% nylon microfiber that is made into a lightweight, knitted fabric. DriSilque dries very quickly, is more breathable than other nylon fabrics, is quite stretchy, and has a silky feel. Its breathability makes it more comfortable than other nylon fabrics in warm climates. DriSilque may not wear as long as other fabrics if worn snugly or cared for harshly. DriSilque is certified by DuPont. It is only used in women's garments.

*Care: machine wash cool, gentle. Use nonchlorine bleach as needed. Tumble dry permanent press.*

## Nylon Mesh

Nylon mesh is a lightweight 100% nylon yarn fabric. It has an open mesh knit construction that makes it comfortable for many people, including those in humid climates. This mesh fabric allows for easy evaporation and dries quickly. Like other nylon fabrics, it reduces friction between garments and outer clothing. It is a durable fabric with little stretch and is used in women's and men's garments.

*Care: machine wash warm, delicate. Use nonchlorine bleach as needed. Tumble dry low; remove promptly.*

## Corban

Corban is a medium-weight, dull-finish, 100% nylon fabric with a smooth feel. It is a good choice for men who prefer a garment that is almost frictionless under outer clothing. It is a very durable fabric, but with little stretch. Corban does not absorb the body's humidity, is a poor breather, and some people find it warm to wear. It dries quickly and is used only in men's garments.

*Care: machine wash warm, delicate. Use nonchlorine bleach as needed. Tumble dry low; remove promptly.*

## Cotton-Polyester

Cotton-poly fabrics are made of 50% cotton and 50% polyester yarn. They have a cottony feel and good moisture absorption. They are durable and have good stretch and movement. The polyester in the fabric helps the garments retain their shape and reduces shrinkage compared with fabrics made of 100% cotton. This is a good all-weather fabric and works well for many people who prefer a cotton-feel garment. It is used for women and men's garments.

*Care: machine wash warm. Use nonchlorine bleach as needed. Tumble dry low; remove promptly.*

## 100 Percent Cotton

100% Cotton yarn fabrics breath well and absorb moisture but do not dry quickly. These garments are for those who want a 100% cotton garment or those who have a medical, work-related, or other need for a natural fiber garment. They are knitted as a jersey or rib knit, and are used for women and men garments.

*Care: machine wash warm, permanent press. Use nonchlorine bleach as needed. Tumble dry low; remove promptly.*

## Dri Lux

Dri Lux is a soft and comfortable fabric that helps keep the body dry. It is made from Dri-release fibers (85% polyester and 15% cotton) which wick moisture away from the body. This wicking ability is a characteristic of the fibers and will not wash out. Dri Lux fabric is comfortable in many environments and may be especially wearable where it is hot and humid. Dri Lux garments dry quickly and resist odor. They are made in jersey and rib knit fabrics. Dri Lux is certified by Optimer. Dri-release is Optimer's registered trademark; U.S. patent no. 5,888,914.

*Care: machine wash warm, gentle. No fabric softener. Use nonchlorine bleach as needed. Tumble dry medium.*

## Carinessa II

Carinessa (pronounced care-in-ESS-a) is made of 91% microfiber polyester and 9% spandex. This blend creates a comfortable, stretchy fabric that allows the garment to stay in place better, move and stretch with the wearer, and conform to individual body styles. Outer clothing glides over Carinessa easily. This fabric is available in women garments.

*Care: Machine wash cold, delicate. No fabric softener. Use nonchlorine bleach as needed. Tumble dry low.*

# Garment Fabrics

## Extra Support

Extra support is a high-performance fabric made of 79% polyester and 21% spandex. It is similar to fabric used in men's compression shorts. It has excellent wicking capabilities and dries quickly. It has a strong supportive feel and reduces friction and chafing during activity. This fabric may be less suitable for general use in hot or cold weather. This fabric is available only in men's garment bottoms.

*Care: Machine wash cold or warm. No fabric softener. No bleach. Tumble dry low. Do not iron. Made in USA.*

## Thermax

Thermax is a lightweight, thermal, rib-knit, 100% polyester yarn fabric. The yarn fibers are hollow, so they trap body heat to warm the wearer. Thermax garments are made only with long-sleeve tops and ankle-length bottoms. They are available for women and men.

*Care: Machine wash warm, permanent press. No fabric softener. Use nonchlorine bleach as needed. Tumble dry medium, permanent press.*

## Military Garments

NATO-color garments are made of 100% polyester yarn in jersey for the tops and rib knit for the bottoms and in an 82/18 blend of polyester and spandex for the extra support bottoms. Marks are silkscreened inside, therefore normally not visible from the outside. These garments are available only for active-duty military service members. Only the service members, temple-endowed family members, and friends of active-duty service members may purchase them.

*Care: If conditions allow, machine wash warm, gentle. No fabric softener. No bleach. Tumble dry medium.*

DriSilque is certified by DuPont, a trademark of E. I. du Pont de Nemours and Company.

Dri Lux is certified by Optimer. Dri-release is a trademark of Optimer Performance Fibers Inc., U.S. patent no. 5,888,914.

# Special Orders: Overview

**Overview.** Full instructions to create a special order are in the Retail Desk Manual. These pages are intended as guidelines that may be helpful while you are working with a customer. **The following pages give more information about specifics.**

**Standard Patterns.** Beehive needs to know which standard piece of clothing is closest to the new garment that will be made. See the Style Numbers heading.

**Style Numbers.** Decide which existing SKU is the style, stature, and size of the garment needed by the customer. Enter this SKU in the Style# space on a special order form.

Style = round neck, crew neck, boxer, brief, etc.

Stature = short, petite, regular, extra tall, etc.

Size = the garment size the customer is most comfortable wearing.

For example if the customer needs a short 100% cotton boxer and wears size small, use the SKU for the Dri Lux short boxer, 415797002 (include the last two digits that designate the size).

**Complete Measurements:** Provide complete measurements for all new or changed orders. The only time measurements are not required is for reorders with no changes at all.

**Shrinkage.** Always explain shrinkage to special-order customers. All patterns allow for shrinkage. A customer cannot assume their special-made garment is "just too big" until they have washed and dried the item 5 times. Remember that all fabrics have some shrinkage.

**No Used Garments as Samples.** We will not accept used garments as samples to match sizing. Garments that have been stretched and shrunk in wearing, washing and drying cannot be accurately duplicated.

**Contacts between Beehive Specials and Customers:** Customers should always work through Distribution or the GSC. Center managers should work with GSC clothing consultants who will coordinate with Beehive if there is an unusual situation. If contact with a customer is needed, they will be contacted by the GSC.

**Medical:** For pockets, tubes, pouches, etc. please give specific location measurements from a fixed point on the garment. *Example: pocket is 4" wide, 7" long. Place it 2" down from the bottom of the waistband, 3" from center front, on the left side.*

**Skin sensitivities.** We have 100% cotton or bamboo for those who need natural fiber fabric. If the concern is rubbing or friction in some area we can work with our current fabrics and find a solution based in sizing, style, or sewing methods.

**Sizing.** We can create smaller or larger garments for those who need unusual sizes.

## Special Orders: Photo Examples

**Lace**

**Outside seams**

Seams are sewn on the outside of the garment.

**Bound neck**

Lace is removed from the neck and replaced with binding.

**Over-edge**

A serger stitch. The raw edge of the fabric is encased by thread.

**Outside-seam bound neck**

Lace is removed and replaced with binding sewn on the outside of the garment.

**Sewn hem**

The lace is removed from the leg and replaced with a sewn hem.

**Drawstring waist**

The waist elastic is removed and replaced with a casing and a drawstring.

**Encased elastic**

The waist elastic is bound in fabric.

# Special Orders: Garments

## Women's Garments

**Bust Cups:** We will make a cup size smaller than a regular cup and a cup size larger than the full cup for cotton-poly when necessary. We will also make larger than a DD cup when needed in DriSilque II and Nylon Mesh II. Be sure to explain the difference in the new patterns to those who have had special orders but who may now be able to choose an off-the-shelf product.

**Nursing Garments:** Nursing garments can be made in a regular cup instead of a full cup, but no other sizes are available now in cotton-poly. Tell customers about the cups sizes available in DriSilque II.

**Mastectomy:** Prosthesis pockets are available in a regular cup or full cup. We strongly prefer making a round neck style. The pockets are sewn to the inside of the bust cup. No prosthesis pockets are available in chemise styles.

**T-Top:** A t-top has no bra seams and is made for sisters who have had a double mastectomy and do not want prosthesis pockets. This style is only for women with this special need. It is different than a chemise top; it is similar to a regular women's top with set-in sleeves but without the bra cups. Please specify "t-top" and size. It is available only in a round neck style and in jersey fabrics, including DriSilque and Nylon Mesh. Customers are also asking for the DriSilque chemise without the gathers and we will make this is option too.

**Hem Options:** Women's bottoms are available with lace, over-edge, or with a sewn hem. *See the photo examples page.*

**Back Seams:** We cannot remove the back seam on garment bottoms. A seam is required in our pattern so that garments curve around the body. Those who find the seam irritating have the option of an outside seam or two seams instead of one. (Two seams are sometimes requested by those in wheelchairs.)

**Gusset Discomfort:** Some women have sensitivity in the crotch area with the gussets. Beehive has several gusset alternatives for standard style women's bottoms (not Carinessa). When the discomfort cannot be relieved with on-the-shelf options describe the concern and what style of gusset the customer thinks would be most workable for her. On the order form name the desired gusset: hourglass, pointed, or diamond and then describe the changes to width or length or whatever the customer needs. All gussets are 100% cotton.

**Carinessa gusset:** Carinessa garments have a cotton liner in place of a gusset. The poly-spandex fabric goes down the leg, but a layer of cotton fits next to the body in the crotch. The cotton used is the same fabric used in the regular style women's bottoms.

**Inseams:** Inseams are typically not made shorter than 7". Height, weight, crotch length, and inseam measurements will identify the need for an inseam shorter than 7". Along with measurements include details in the comments box. *Example: Sister is very short and needs leg shortened by 2 inches.*

**Women's One-Piece:** We do not remove the bra seams on a women's one piece. If the sister needs a chemise or t-top style explain that she'll need to try a two-piece garment.

## Men's Garments

**Back Seam:** We cannot remove the back seam on garment bottoms. A seam is required in our pattern so that garments curve around the body. Those who find the seam irritating have the option of an outside seam or two seams instead of one. (Two seams are sometimes requested by those in wheelchairs.)

**Inseams:** Inseams are typically not shorter than 7". Height, weight, crotch length, and inseam measurements will identify the need for an inseam shorter than 7" Include an explanation in the comments box. Also, please include an explanation if the inseam length increases more than 4".

**Men's One-Piece:** There are limitations on how short the men's one-piece garments can be made. The gore piece in the back cannot be sewn into the hem. 4½" is the maximum the overall length that the pattern can be shortened. If the brother needs a shorter garment, suggest that he try a two-piece style.

**If problems with a special persist—  
Contact the GSC and consult one of the  
clothing specialists. They will help you explore  
all the possibilities.**

# Special Orders: Skin Sensitivity and Ceremonial Clothing

## Skin Sensitivity

**Seam Irritation:** The best solution for customers with irritation to seams or neck binding is to request outside seams or binding. Garments with outside seams are sewn completely as if inside out with the exception of the waistband and marks. The face of the fabric is on the outside as normal. Outside seams are more visible through outer clothing.

If customers have sensitivity to synthetic fibers, 100% cotton thread is available. However, cotton thread cannot be used with synthetic fabrics; it is thicker and bunches on synthetic fabrics and does not have comparable shrinkage.

**Irritation to Elastic or Rubber:** Customers may request encased elastic or drawstring for the waist. Sisters may also request no lace.

**No Lace Issues:** Requests for women's bottoms with no lace can have an over-edge hem or sewn hem to replace the lace.

Women's tops with no lace have a binding that replaces the lace. We apply the binding only in locations where the lace would be used. Regular hemming is used in other locations.

**Requests for 100% Cotton Fabric:** We can make all styles in 100% cotton fabric. (Examples: men's scoop neck top, women's one-piece, midcalf bottom, men's boxer, etc.) Styles are made in jersey fabric will be 100% cotton jersey. Those in styles made with rib knit will be made in 100% cotton rib knit. We cannot change a rib knit top to a jersey or vice versa. Please specify 100% cotton thread if required.

**Special Fabrics:** A specialty fabric is available for customers who have tried 100% cotton or our other fabrics without success. Bamboo is the current approved fabric. It is very soft, but not as durable as other fabrics. Bamboo garments may have to be ordered more often. Encourage customers using this fabric to pay particular attention to care instructions.

**Irritation to Labels:** Customers may remove labels if they are causing irritation. Cutting out the label with scissors using a slightly rounded shape has been effective for many customers. Pulling them out may cause damage to the seam. All garments with outside seams will not have the label sewn into the garment, but will have label information on the package.

## Ceremonial Clothing

**Slippers:** We make slippers in the standard pattern adjusted to fit the size requested. Include a tracing of the customer's foot when submitting a special order for slippers.

**Pleated Robes:** The maximum length for a pleated robe is 55". This is because the pleating machine will not do anything longer. If the customer needs a longer length, recommend a gathered robe.

**Special Needs Robes:** We can make a shortened pleated special-needs robe. Please provide the diagonal measurement and the total length needed. Slip hooks or Velcro (see Velcro) may be preferred over ribbon ties. Discuss the gathered special-needs robe that is available in standard production and if the customer would prefer a pleated robe go ahead and create the special order in the desired fabric. Comment that the customer knows about the gathered robe and wants pleated.

**Velcro:** Velcro can be used instead of ties or hooks on robes. Provide the waist measurement in order to do this alteration. The Velcro closure is only available on the tissett fabric, since Velcro would ruin the sheer fabrics. Velcro closures can also be made for aprons. Provide the waist measurement.

**Allergies:** The easiest solution for customers with skin allergies who need 100% cotton ceremonial clothing is to order biodegradable clothing. If these are unavailable, we can produce them. Pleated robes are not made in 100% cotton because cotton will not hold the pleats.

**Sash:** We can make the sash as long or as short as needed. Please provide the waist measurement.

**Apron:** We have a smaller apron pattern available for people under 4'6".

**Big trousers:** We have a big-style trouser that is available for waist sizes 44–64. These trousers have an elastic back with a drawstring front which allows for some ease in the rise.

# Special Orders: Measurements

**Waist:** Circumference around body at natural waist level.

**Hips:** Circumference around the body at the fullest part of buttocks.

**Inseam:** Measure the inside of the leg from the crotch to the top of knee cap.

**Crotch Length:** Length from the front waistline down through the crotch and up to the back waistline.

**Chest (Men):** Circumference of the body at the widest part of the chest.

**Upper Bust (Women):** Circumference around the body just below the armpits with breath expelled.

**Bust (Women):** Circumference around the bust at the fullest point.

**Underbust (Women):** Circumference around the body just below where the breast attaches to the chest wall with breath expelled.

**Shoulder to Underbust:** Length from the center of the shoulder, over the fullest part of the bust and continuing over the bust to where the breast attaches to the chest wall.

**Thigh:** Circumference around the leg at the widest part of the upper leg.

**Knee:** Circumference around the leg at the top of the knee cap.

**Midcalf:** Circumference around the leg at the widest part of the calf.

**Shoulder to Hem:** Length from the center of shoulder to where the customer wants the hem to sit. On ladies it may be easier to measure on their back. If measured on the back please state that measurement is a back measurement.
